

# Global Securities and Litigation Monitoring

## A Dedicated Global Team for Institutional Investors

BLB&G's Global Securities and Litigation Monitoring Team is comprised of attorneys, financial analysts, and fraud examiners who specialize in advising clients on non-U.S. shareholder actions. Members of the team are based in the United States, Europe, and Canada, offering local knowledge and insight into fee-shifting provisions, funding and insurance agreements, and other unique aspects of non-U.S. litigation.

## Strategic Collaborations, Independent Advice

To guide clients through the complexities of global securities actions, BLB&G maintains close yet fully independent relationships with law firms, litigation funders, and aggregators in key international markets. We have no referral fee arrangements with these entities, allowing us to provide our clients with independent and impartial advice when evaluating:

- Potential legal actions in global jurisdictions
- Funding proposals and aggregator agreements
- Strategic options for maximizing recoveries and minimizing risks

Our deep familiarity with these global resources ensures clients receive the most favorable terms, while retaining full control of their litigation decisions. **We advise our clients on a fully independent basis—our recommendations are driven solely by each client's best interests.**

## Track Record of Success in Global Cases

Our team has significant experience litigating matters that involve non-U.S. law issues and international discovery, including cases arising from misconduct by corporations domiciled or operating abroad. We have also pioneered recoveries under the Dutch Collective Settlement Act, securing substantial recoveries for investors who purchased shares of non-U.S. companies. In many instances, our team explores avenues for bringing non-U.S. transactions under U.S. court jurisdiction—broadening recovery opportunities and establishing key precedents that protect global investors.

## Comprehensive Monitoring and Assessment

Our dedicated in-house team of attorneys, financial analysts, and fraud examiners monitors and analyzes shareholder actions and recoveries worldwide. Our ongoing research focuses on high-profile mass or group actions and any matters of special interest to our clients. By comparing trading records against international actions, we help investors understand:

- The merits and risks of joining each case
- How foreign legal frameworks may affect recoveries
- Which funding and litigation strategies best serve their objectives
